

Call for Papers

8th World Congress of Chemical Engineering, Montreal, August 23-27, 2009

The **8th World Congress of Chemical Engineering (WCCE8)** is being held in Montréal, Quebec, **August 23-27, 2009**. Our Canadian team has put together an exciting program with help from our colleagues internationally. The congress theme is "*Challenges for a Changing World*".

The Call for Papers opened on June 16, 2008 and will close November 30, 2008.

Abstracts can be sent through Hermes Conference Centre via the WCCE8 web site. Details are available at www.wcce8.org/call_for_papers_instructions.html.

The Congress program will include plenary sessions, oral and poster presentations, student programs as well as a full social program. A partial list of plenary speakers includes:

- Dr. Greg Lewin, President, Shell Global Solutions
- Professor Mark Saltzman, Yale University
- Professor Gerhard Kreysa, President, DECHEMA

The **major WCCE8 themes** are:

- Energy
- Green Processing
- New Materials and Processes
- Biotechnology
- Contemporary Topics in Chemical Engineering
- Chemical Engineering and Society

Examples of industrially-oriented program topics that will be of special interest to engineers working in industry include:

- Financing Industrial Research and Development
- Process Intensification for Sustainable Manufacturing
- XTL (X to Liquid)
- Process Safety and Loss Management

View the full technical and industrial programs at www.wcce8.org or sign-up to receive more information on the congress at www.wcce8.org/onlineform.html

We look forward to receiving your paper and seeing you in Montréal in 2009.

Philippe Tanguy, Congress Chair, Ecole Polytechnique

Richard Munz, Congress Vice-Chair, McGill University

Roland Andersson, Executive Director, Canadian Society for Chemical Engineering
